

# Alice Lonza

## *MSc Industrial Engineering & Management Student*

Currently working as an Industrial Engineer Intern, with practical experience in warehouse operations, planning, and forecasting. Driven by data analysis, operations research, and mathematical optimization, I am seeking an entry-level role in supply chain, logistics, or operations to leverage my problem-solving skills in driving operational efficiency and supporting strategic decision-making.

## Education

**MSc Industrial Engineering & Management** | University of Twente | Netherlands, 2024 – present  
Specialization: Production & Logistics Management | Manufacturing Logistics, Supply Chain and Transportation Management

**Bachelor's Degree in Industrial Engineering - Management track** | Università degli Studi di Trieste | Italy, 2020 – 2023  
Thesis: "Analysis of Public Transport Systems: Optimization Proposals for Rural Areas": studied transport planning solutions, focusing on service frequency optimization, cost-efficiency, and demand-responsive mobility systems. Assessed the impact of different operational strategies on accessibility and overall system performance.

**Exchange Semester - Erasmus+ Program (5 months)** | Universidade do Minho | Guimarães, Portugal, 2022 – 2023  
School of Engineering – Department of Production and Systems

**Scientific High School Diploma** | Liceo Scientifico Guglielmo Oberdan | Trieste, Italy, 2020

## Professional Experience

**Industrial Engineer Intern – Master's Thesis** | GXO Logistics | February 2026 – Present  
Analysing warehouse operational data to evaluate productivity and quantify the effort required for different warehouse tasks. Supporting warehouse process improvement initiatives through data analysis and performance evaluation.

**Data Analyst** | Rysa - Research and Business Innovation (Trieste, Italy) | April – July 2024  
Collected, processed, and analysed complex datasets to identify patterns, trends, and performance indicators. Applied data validation and statistical analysis to support decision-making and transform raw data into actionable insights.

**Artistic Gymnastics Coach** | ASD Trieste Ginnastica (Trieste, Italy) | September 2019 – June 2024  
Certified Technical Coach by the Italian Gymnastics Federation (FIGI). Conducted gymnastics classes for children and teenagers aged 3 to 15, planning training activities and supporting their technical and personal development.

## Relevant academic experience

**Supply Chain & Warehousing:** Developed data-driven solutions for warehouse operations, including activity profiling, storage allocation, warehouse layout design, inventory management and order-picking optimization. Applied Python, operations research, mathematical optimization and performance analysis techniques to improve operational efficiency.

**Transportation & Logistics:** Designed and evaluated freight transportation and vehicle routing solutions using operations research, optimization models, heuristics and scenario analysis. Assessed trade-offs between operational efficiency, sustainability and service performance in logistics networks.

**Simulation, Planning & Project Management:** Built simulation models for manufacturing and logistics systems using Siemens Plant Simulation. Developed planning, resource allocation and project management solutions for operational environments, combining simulation, forecasting and capacity planning techniques.

**Data Analytics & Machine Learning:** Applied statistical learning, predictive modelling and machine learning techniques to transportation, healthcare and operational datasets. Developed forecasting models, classification algorithms and data-driven decision-support tools using Python and R.

## Skills

Programming: Python (Pandas, NumPy, Gurobi, PuLP), R, Delphi  
Engineering Software: Excel, Siemens Plant Simulation, AIMMS, ProjectLibre, FreeLCA.

## Languages

|                                                                                         |                                      |
|-----------------------------------------------------------------------------------------|--------------------------------------|
| Italian - Native                                                                        | Portuguese – A1+ level certification |
| English – C1 level certification, fluent, academic and professional working proficiency | Dutch – start learning               |
